### #2 Almen Gage Jr.

If you don't need the high precision of a digital gage, we offer the Almen Gage Jr. in an analog style that's ideal for general purpose shot peening and blast cleaning.

The small size and light weight of the Almen Gage Jr. (4" tall and less than 1/2 lb. in weight) make it convenient for operators to use anywhere. The Almen Gage Jr. has a 1 3/4" dial indicator with .0005 graduations for easy reading of the Almen strip arc height.

The Almen Gage Jr. also has many of the same features of the Advanced Almen Gage including:

- precision machining
- durable hardcoat finish
- patented magnetic grip
- stem mounted indicator
- MIL-S-13165 compliant

*Note: Almen Gage Jr cannot qualify for SAE J 442 since it does not have a digital indicator with 0.0001" resolution. Further, it does not qualify to AMS 2430 because it does not have the endstops.*
